## SUMMARY

Passionate about web development, with expertise in both front-end and back-end technologies to create intuitive and responsive web applications. Proficient in React.js, Node.js, Express.js, and MongoDB, I aim to contribute to innovative projects that enhance user experiences while continuously learning and applying new technologies.

---

## PROJECTS

### World Estate Website

- I built a full-featured real estate website using the MERN stack, incorporating React.js for the frontend, Node.js and Express.js for the backend, MongoDB for the database, and Tailwind CSS for responsive and modern styling.
- Users can list properties for sale, rent, or purchase.
- [world-estate.onrender.com](https://world-estate.onrender.com)

### Autohub

- Developed a user-friendly Cars Service Website using HTML, CSS, and JavaScript, aimed at simplifying car maintenance and service bookings. The website features a clean and intuitive user interface, enabling users to easily schedule appointments. This project focused on creating a seamless online experience for car owners, making car maintenance as convenient as possible through efficient web solutions.

### Weather Tracking Website

- Designed and developed a Weather Tracking Website using HTML, CSS, and JavaScript, enabling users to track real-time weather conditions for any city or country. The website features a responsive design and an intuitive interface, providing users with accurate and up-to-date weather information, including temperature, humidity, and forecasts & demonstrates the integration of API data to deliver essential weather insights in a user-friendly format.
